CONTENTS OF VOLUME 20

Number 1, January 1976

Ian David Kane. A Numerical Investigation into the Solution of the Equations Describing Baroclinic-Barotropic Instability in the Atmosphere 1

Bernard Rosen. Automation of the Derivation of Dispersion Relations: II. Higher Order Dielectric Functions in Hot Plasmas 22

Stephen Mudrick. On the Use of a Scale-Dependent Filter in Channel Model Integrations 33

G. W. Cunningham and P. H. E. Meijer. A Comparison of Two Monte Carlo Methods for Computations in Statistical Mechanics 50

I. S. Greig and J. Ll. Morris. A Hopscotch Method for the Korteweg-de-Vries Equation 64

Yu. A. Berezin and V. A. Vshivkov. On the Firehose Instability of Alfven Waves . . . 81

Giulio Casati and Joseph Ford. Computer Study of Ergodicity and Mixing in a Two-Particle, Hard Point Gas System 97

Note

Mihaly Mezei and Edwin S. Campbell. A Computational Procedure for Obtaining the Poles of a Spherical Harmonic of Order N; Application to the Multipole Expansion of Electrostatic Interaction 110

Erratum 117

Announcement 118

Number 2, February 1976

F. H. Harlow, A. A. Amsden, and J. R. Nix. Relativistic Fluid Dynamics Calculations with the Particle-in-Cell Technique 119

D. Beeman. Some Multistep Methods for Use in Molecular Dynamics Calculations . . . 130

K. Srinivas, J. Gururaja, and K. Krishna Prasad. An Assessment of the Quality of Selected Finite Difference Schemes for Time Dependent Compressible Flows 140

L. G. Taff. Numerical Solution of the Collisionless Boltzmann Equation for Stellar Systems 160

U. Schumann and Roland A. Sweet. A Direct Method for the Solution of Poisson's Equation with Neumann Boundary Conditions on a Staggered Grid of Arbitrary Size . 171

L. I. Ponomarev and L. N. Somov. The Wave Functions of Continuum for the Two-Center Problem in Quantum Mechanics 183

Jenö Gazdag. Time-Differencing Schemes and Transform Methods 196

Basil N. Antar. On the Solution of Two-Point Linear Differential Eigenvalue Problems 208

Yong Woo Shin and Richard A. Valentin. Numerical Analysis of Fluid-Hammer Waves by the Method of Characteristics 220

Notes

John A. Trapp and John D. Ramshaw. A Simple Heuristic Method for Analyzing the Effect of Boundary Conditions on Numerical Stability 238

Shih-Yung Chang. An Algorithm for Evaluation of Two-Electron Integrals by Numerical Integration Method 243

Millard H. Alexander. Stable Solutions of the Close-Coupled Equations for Ro-Vibrationally Inelastic Collisions 248

BRENDAN B. GODFREY AND A. BRUCE LANGDON. Stability of the Langdon-Dawson Advective Algorithm 251
R. W. REDDING AND W. P. LATHAM. On the Calculation of the Parabolic Cylinder Functions. II. The Function $V(a, x)$ 256

NUMBER 3, MARCH 1976

JERROLD S. ROSENBAUM. Conservation Properties of Numerical Integration Methods for Systems of Ordinary Differential Equations 259
JOHN C. CHIEN. A General Finite-Difference Formulation with Application to Navier–Stokes Equations 268
GEORGE N. BALANIS. Long Wavelength Approximations to Periodic Elastic Media and Numerical Applications 279
MICHAEL J. ANTAL AND CLARENCE E. LEE. Charged Particle Mass and Energy Transport in a Thermonuclear Plasma 298
W. BUTSCHER AND W. E. KAMMER. Modification of Davidson's Method for the Calculation of Eigenvalues and Eigenvectors of Large Real-Symmetric Matrices: "Root Homing Procedure" 313
J. A. MARUHN, T. A. WELTON, AND C. Y. WONG. Remarks on the Numerical Solution of Poisson's Equation for Isolated Charge Distributions 326
SIN-CHUNG CHANG AND J. KENNETH SHULTIS. Calculation of the Asymptotic Diffusion Lengths for Highly Anisotropic Particle Transport 336
J. N. LYNESS. Applications of Extrapolation Techniques to Multidimensional Quadrature of Some Integrand Functions with a Singularity 346
NOTES
R. L. COLDWELL AND M. A. POKRANT. Least Square Regression with Multinomials of Restricted Amplitudes 365
F. A. BLOOD, JR. Correlations in Power Residue Generated Random Numbers 372

NUMBER 4, APRIL 1976

B. A. HARGRAVE. Numerical Approximation of Eigenvalues of Sturm-Liouville Systems . 381
J. P. BORIS AND D. L. BOOK. Flux-Corrected Transport. III. Minimal-Error FCT Algorithms 397
UZI KALDOR. An Algorithm for Generating Goldstone and Bloch–Brandow Diagrams . 432
CHARLES QUON. A Mixed Spectral and Finite Difference Model to Study Baroclinic Annulus Waves 442
HERBERT E. SALZER. Inverse Laplace Transforms of Osculatory and Hyperosculatory Interpolation Polynomials 480
NOTES
ROBERT L. PEXTON. Application of Salzer's Inverse Laplace Transform Algorithm . 492
V. B. BELYAEV, J. WRZECIONKO, M. I. SAKVARELIDZE, AND A. T. ELIAVA. Separable Expansion of Potential in Multidimensional Space. Three–Body Problem 495
